Machine Upgrades for your Husky Equipment

We are here to help you. From custom requests to standard products, our Business Advisors and customer support design teams are here to help find the best solution to suit your production and planning needs.

Our Husky Upgrades are packaged technology upgrades for Husky equipment that can expand capability, improve productivity, reliability and energy consumption.

Encore™ programs manage obsolescence, increase operational reliability and extend the life of existing injection molding systems from Husky.

Modernization Upgrade programs are structured upgrade solutions for Polaris machines targeting improved energy consumption, maintenance, cycle time and ease of use.
